Schloss Wachenheim – Tradition and vision.

Schloss Wachenheim AG is one of the world's largest suppliers of sparkling and semi-sparkling wines and other alcoholic and non-alcoholic beverages.

Pioneers of alcohol-free enjoyment.

35 years head start,
0.0% compromise.

As early as 1987, Schloss Wachenheim demonstrated an instinct for market trends and market developments and focussed on the dealcoholisation of wine by vacuum distillation – long before the market was ready for it.

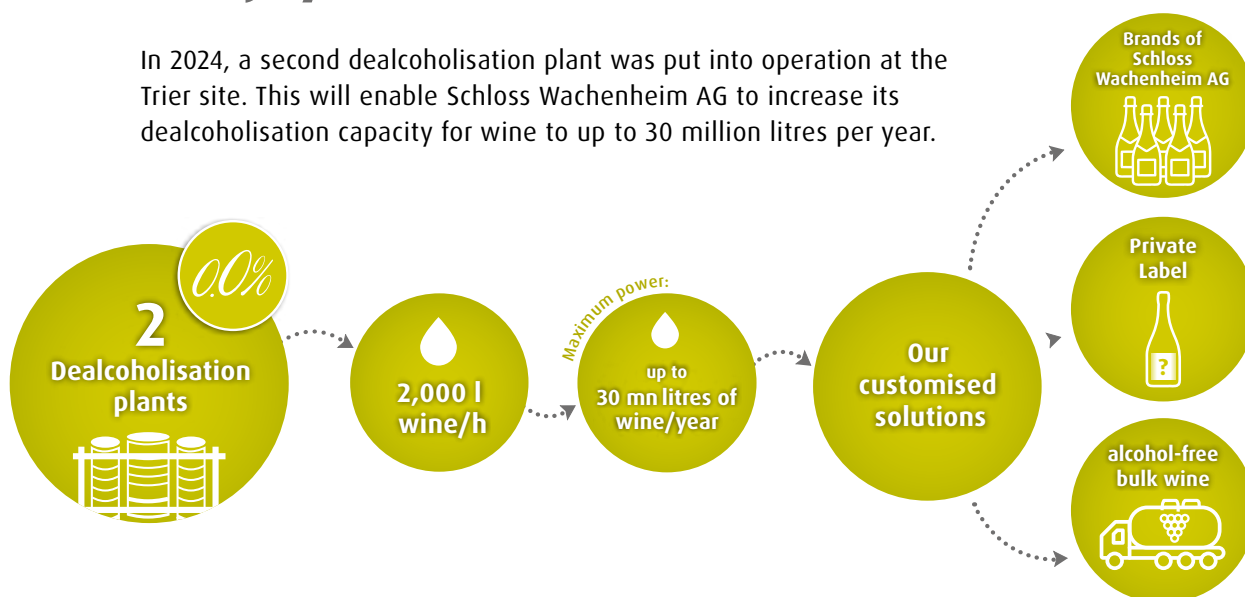

With a clear vision, a pioneering spirit and an investment of several million euros, the gentle dealcoholisation process has since been perfected to produce alcohol-free wine with a full flavour and maximum variety of aromas.

We are shaping the future of alcohol-free!

More enjoyment. Less alcohol.

In 2024, a second dealcoholisation plant was put into operation at the Trier site. This will enable Schloss Wachenheim AG to increase its dealcoholisation capacity for wine to up to 30 million litres per year.
